September 7, 1961

Tillamook County Surveyor
Court House
Tillamook, Oregon

Dear Sir:

On August 29, 1961 I rewitnessed the 1/4 corner between Sections 9 and 16 in Township 3 South, Range 8 West of Willamette Meridian.

On the above date I found as follows: 10" (now 20") Hemlock South 12° East 43 links. This tree had been previously opened and the scribe plainly shows. 13" Fir North 26 East 90 links at this point there was pitchy slabs showing, but could find nothing of a scribed face.

I set a temporary stake in the center of a catroad at the intersection point of the distances from the two original BT's. From this point I marked new as follows:

Scribed "1/4 S 9 BT" on a solid 65" old growth snag stump which bears North 37° East 22.3 ft. This stump is marked "save" and will be on the North edge of the finished Moon Creek Road, now under construction.

Scribed "1/4 S 16 BT" on the root of a 70" old growth Douglas Fir which bears South 36° East 116.5 ft.

The Moon Creek Road will destroy the original Hemlock bearing tree.

Sincerely yours,

[Signature]
