SURVEY FOR THE OREGON STATE BOARD OF FORESTRY

February 20, 1961

The point for corner determined by the remains of the original bearing trees:

A fir snag, 43 inches in diam., bears S 68° W, a distance of 23.1 feet. The scribe marks: LN N7W S3 Br are visible.

An uprooted hemlock stub, 5 inches in diam., in the NW quadrant. The scribe marks ST are plainly visible. The stump hole could not be determined.

No evidence remains of the other Ets. nor could the corner stone be found.

At the point for corner:

Set a 1½ inch iron pipe, 3 feet long with an Oregon State Board of Forestry bronze cap stamped: TEN N7W S34 S35 S3 S2 T18N 1951 199.

from which:

A fir snag, 21 inches in diam., bears S 46° W, a distance of 26.2 feet, scribed: TN N7W S5 Br 199.

A hemlock snag, 30 inches in diam., bears N 51° W, a distance of 51.2 feet, scribed: TN N7W S54 Br 199.

A fir snag, 31 inches in diam., bears N 85° E, a distance of 22.4 feet, scribed: TEN N7W S36 Br 199.

Placed a metal location marker on this Br marked: Sec. 25 TEN N7W Sec 36 Cor 28.8 ft. S 85° E.

Placed a mound of stone 1 ft. high & 1½ ft. base around the corner.

The above work done by Don Davis, Transitman; Adolf Berglund and Richard Norris, Chainmen; under my direction.

Lyle E. Beyers
Forest Engineer
