June 11, 1957, with Rob't. L. McCullough, at the site of the second temporary post, for the corner to sections 16, 18, 20 & 21, T28, R7W, N.M., I set a 1½" galvanized iron pipe 20" long, 20" deep in loose soil and broken rock on steep hillside from which:

A stump 40" diameter bears N 50° E 14.4 feet marked 316 BT.

A stump 42" diameter bears N 44° W 102.4 feet marked 317 T28 R7W 1957 BT.

A stump 40" diameter bears S 68° W 136.7 feet marked 320 322 BT.

A stump 43" diameter bears S 31° E 80.4 feet marked 331 BT.

Subsequent observation from the NW corner between sections 16 & 17 show this point to bear S 60° 31' E from said NW corner.

The angle between the east and west halves of the line between sections 16 and 21 was determined by transit. True bearings could not be obtained because of continued overcast.
