Revisit of Corner of Sections 19, 20, 29 and 30, T. 2 S., R. 10 W., W.M.

Found evidence of all four B.T.'s as follows:
24" Hemlock North 60° E, rotten windfall.
22" Hemlock North 22° W, still green with scribing visible.
20" Hemlocks both snags, the S.E. only a rotten stub.
Set 1" Iron Pipe with babbited 3" Cap stamped

in true original position, from which, I scribed for new Bearing Trees:

A 10" Hemlock bears N 35° E, 14.5 ft. distant marked 320 B.T. 376#
A 40" Cedar bears S. 35° E., 42.5 ft. distant marked S 29 B.T. 376#

In the presence of Jerry Gass, Sept. 24 and 27, 1956

Registered Land Surveyor
Oregon # 376

Rewitness of Section Corner 1, 2 11 and 12, T.3 S., R. 10 W., W.M.

Because of road construction which necessitated destruction of the Bearing Trees for Sections 1 and 2, I revisitied as follows:

A 21" Hemlock bears N.35° E, 54.5 ft. marked S1 B.T. # 376
A 17" Hemlock bears N. 1° 30' W, 52.9 ft. marked S2 B.T. #376

The Section 12 B.T. now a 18" Hemlock still bears S 3° E, 74.1 ft. and the 2" Iron Pipe remains in place though now is on the South edge of the relocated road.

Rewitess of 1/4 Section corner between Section 5, T. X S., R 10 W. and Section 32, T. 2 S., R 10 W., W.M.

August 29, 1956

Found Bearing Trees scribed by County Surveyors Anderson and Gustrom in 1924 down at West edge of timber, the timber west of the corner having been logged, with the old corner stake up-rooted intact with the earth wall of the closest tree.

After estimating the position of the trees when they were standing, I set an iron pipe in the exact location called for in Anderson's notes. This coincided with the estimated original position of the uprooted stake. The iron pipe is 3/4" galvanized pipe, 20" in the ground and 4" above, with 1½" babbited cap marked:

from which I scribed new bearing trees:
12" Hemlock marked 1/4 B.T. # 376 bears S 75° E, 58.6 ft.
18" Hemlock marked 1/4 B.T. # 376 bears S 40° 40' East, 80.2 ft. distant.
