History of original corner establishment:

County Survey Book 4, Page 46, reports that in 1922 W. S. Coates found the original post and 24" Hemlock B. T. The B. T. was "properly marked". Coates set a new post and one new B. T.: "90" Fir bears N 65° 00' W 29.0 ft. Old B. T. 24" Hem. N 3° 0' E 16.0 ft. In presence of W. E. Anderson, Alfred Gulstrom, C. Stranahan. 1922."

County Survey Book 2, Page 463 reports that C. G. Collard, L. S. 376, found the original 24" Hemlock B. T. and the Fir stump set by Coates in 1922. At record distance and bearing from said bearing trees Collard set 14" X 24" galv. iron pipe with lead plug stamped as shown below. Collard set two new bearing trees: A hemlock, 14" brs. S 57° 30' E 16.1 ft. scribed "BT 1/4 S 36 # 376". 14" Hemlock brs. N 23° W 0 ft. 16.1 ft. scribed "BT 1/4 S 36 # 376". The date of Collard's restoration of this corner is given as February 9, 1961.

Description of corner evidence found:
I found Collard's lead plug monument and his two new bearing trees as reported by him in February, 1961. I also found the original 24" Hemlock bearing tree, and the 90" Fir Bearing tree set by Coate's in 1922; from Collard's monument they bear as follows: 24" Hem. (now 30" stump) brs. N 03° E 16 ft. to old face, scribing no longer visible. 90" Fir stump brs. N 65° W 29.0 ft. Scribing no longer visible. Collard's S. E. bearing tree is now a dead snag.

I set one new bearing tree: 24" Hemlock brs. N 48° E 30 ft. to face scribed "1/4S36BT".

I, Karl F. Foeste, hereby certify that I witnessed the above corner as herein described in October, 1976.

Witnesses:  
Nelsd. A. Engstorf  
Allan F. Hofmann

Recorded in the office of Surveyor County of Tillamook
State of Oregon I hereby certify that the within instrument was filed in this office for record on the day of December 1976

Karl F. Foeste, Registered Professional Land Surveyor of the State of Oregon
