TILLAMOOK COUNTY SURVEYORS OFFICE

1/4 CORNER COMMON TO SECTIONS 2 AND 1 T.N..R.10W..W.M.

TINR10W
1/4

I found a 5" diameter spruce post scribed 1/4 S (no record). I replaced the found post with a 1 1/2" iron pipe and 3" Tillamook County Surveyors brass cap in a 10" concrete cylinder. I layed the found post alongside the new monument.

1991

History of found monument

The said post was used by the Oregon State Board of Forestry for subdivision of the sections 1 and 2 in 1959 (See T.C.S. Map #B-437) and on several surveys thereafter. I also found 2 unrecorded bearing trees, which appear to be approximately 40 to 50 years old judging from a ring count on the SE B.T., and are located as follows:

#24" hemlock S.85 E. 16.94"; (I partially opened the face to expose the scribing and get an approximate age of the unrecorded witness. I set a T.C.S. brass washer with finish nail in the face. The distance was measured to the said brass washer).

#19" hemlock snag 25' high N.85 W. 19.50"; (Found portions of scribe marks on rotten face).

reset found 1" aluminum pipe N.11 W. 1.92'. (reported on map #A-3209).

reset found 1" aluminum pipe S.78 W. 1.80'. (reported on map #A-3209).

New Accessory

#72' hat section post North 1.5'.

#10' hemlock N.54 W. 15.40' scribed 1/4 S2 B.T

All distances to new Bearing trees are measured to a finish nail with a Tillamook County Surveyors brass washer in the face.

# indicates Tillamook County Surveyors yellow metal location post attached.
