**Found Monument(s) and Accessories (Condition & Source):** The original corner stone set by H. Meldrum in 1893 is now gone. All of the original 1893 bearing trees are also gone. Meldrum’s original notes are filed with the BLM as Field Note Volume: OS-R0353 Page: 0285. I found all three fir stumps with visible scribing at record position and the one fir snag (now 15' tall and rotten) set by Louis W. Amore, R.E. 2311 in 1955 and recorded in Book 2, Page 325, Tillamook County Survey Records.

**Monument Set (Procedures and Description):** Set an 18” x 2” iron pipe with a 3” diameter Tillamook County Surveyor’s brass cap stamped as shown here. I placed a 12” diameter plastic cylinder around the monument and filled the cylinder with 60 pounds of concrete and placed a mound of stones around the cylinder. The monument was set by holding the record distances measured from the face of the found fir stumps from the 1955 Oregon State Board of Forestry restoration that were set from the original stone.

**Sketch of Found Monument:**

**Other new accessories set:** Set a 72” Hat Section post with yellow metal location tag East 4.0' from the corner monument. Nailed a yellow metal location tag on the found 52” Douglas Fir stump located at record position with found scribing “T2NR8WS38BTRE2311”.

**New Bearing Trees:**  
- "A 15” diameter Douglas Fir tree scribed “T2NR8WS38BT” with an aluminum washer stamped “Till. Co. Surveyor” and nail set between the ‘B & T’ which bears North 22° West 35.0’.
- "A 12” diameter Douglas Fir tree scribed “T3NR8WS38BT” with an aluminum washer stamped “Till. Co. Surveyor” and nail set between the ‘B & T’ which bears North 50° West 17.7’.

**INDICATES TILLAMOOK COUNTY YELLOW METAL LOCATION POSTER TAG ATTACHED.**

**Location & Comments:** This corner is located on a very steep southwesternly facing slope approximately 350' South of Cook Creek Road.
