Found Monument(s) and Accessories (Condition & Source): Found a 3" diameter Brass cap 18" below the gravel road surface. This monument was found to be upright and in position, but the stamping on the cap is now illegible. Found a 7" tall broken snag at position with tree remains East of snag (was a 49" diameter Spruce tree with face overgrown and a B.L.M. location poster attached bearing N. 55° E 158 ft. See Rewitness Book 6, Page 483A). Found a 79" diameter Spruce tree at position (was a 49" diameter Spruce, face overgrown, location poster attached bearing N. 33 °40' W. 53 ft. See Rewitness Book 6, Page 483A). This bearing tree is bowed and appears to be moving down the hill towards the road. Found a 16" diameter Alder tree with bark scarring visible with a B.L.M. tag now bearing S. 18° W at a distance of 27.78'. (Was a 9" Alder tree bearing S. 18° W 28.85' See Rewitness Book 6, Page 483A). This bearing tree is bowed and appears to be moving down the hill towards the road. The 10" Alder and 12" Alder bearing trees as described in Rewitness Book 6, Page 483A are now gone.

Monument Set (Procedures and Description): 2" diameter Brass Cap in a 10" diameter cast iron monument box and 120 pounds of concrete, 3" blow the gravel road surface. The monument is stamped as shown hereon.

Sketch of Found Monument: Brass Cap was illegible, but I found the center punch. I believe this to be the BLM monument set in Rewitness Book 3, Page 109. I left this brass cap at position as an underground monument.

New accessories set: Reset a 72" Hat Section post with yellow metal location tag South 10° East 11.00' from monument.

New Bearing Trees Set: No new bearing trees were set.
Location & Comments: The monument is located in the southerly track of the Kilchis River Forest Road at approximately the intersection of a gravel road Northerly that goes to a gravel bar.
