X Referenced Out

Monument Set (Procedures and Description): The Found Monument Was 18′ Below Grade. The position of the Found Monument Was Checked By Performing a Direct Static Tie and the Position Was Compared to the 2 Previous Direct GPS Ties. Once the Position Was Verified to Be Good the Total Station Was Set Up and Leveled; Using the Laser Plummiet 2 Reference Monuments Were Set in the Asphalt. The New Monument Was Placed Directly on Top of the Old Monument and Cemnt Was Placed Around the New Monument and a Distance-Distance Measurement Was Taken From the 2 Reference Monuments to Place the Exact Location of the Center of the Monument. The Final Position Was Then Checked With a Direct GPS TIE.

New accessories set: ALL BEARING AND DISTANCES ARE IN GROUND:
