

Tillamook County Solid Waste

For more information about recycling or hazardous waste disposal:

Call (503) 815-3975 or email us at recycle@co.tillamook.or.us

or visit our website at www.co.tillamook.or.us/solid-waste

Focus on Metal Recycling

Whether it's the lid of a "tin" can or the undercarriage of a truck, metal is recycled in essentially the same way throughout the world. Pieces of metal are cut, pressed, crushed and loaded into furnaces according to a "special mix" that varies depending on the input material and the desired outcome material.

With or without rust, with or without paint, each can, bed frame, shovel, tire rim, and car body adds up, contributing to a recycling process that provides society with new cans, tools, cars, rebar, and all those things made of metal that surround us each day. Your old toaster that no longer works may become a tip in a ball point pen, or the metal hanger you no longer need may return as a part in your new lawn mower.

Collect nails, screws, small metal pieces, and lids in a tin can, and then squeeze the top of the can shut. This will prevent the smaller items from falling out when the can gets moved, dumped, crushed, and transported.

BUT ONLY IF YOU RECYCLE IT!
Metals recycling is a logistics-heavy, energy-intensive process that is far beneficial to the process necessary to mine and process iron ore into new steel products. It is also a system that has a strong domestic base, enabling locally collected materials to be recycled domestically, and then returned to domestic manufacturers and/or users.

Of the 14,000 tons of materials recycled in Tillamook County in 2020, one third of it was scrap metal -- nearly 4,700 tons!

Yes, we **can** make a difference – one **can** at a time.

Paint Recycling Made Easy

Recycle Your Paint

There are over 180 PaintCare sites in Oregon where households and businesses can recycle or dispose of unwanted paint, stain, and varnish all year round, including these sites in Tillamook County:

True Value
