

List of materials suspected of containing asbestos

This table identifies commonly found construction and demolition waste materials that may contain asbestos.

This is not a complete list of all asbestos-containing materials.

<u>Suspect Friable Asbestos Containing Materials</u>
Acoustical ceiling tiles
Air-duct cement, tape, and insulation (white paper on seams and or complete wrap)
Block insulation, Magnesia (MAG)
Building insulation – Vermiculite in walls, attics- Not including fiberglass, Cellulose, Rockwool
Adhesives/ Mastics (If dry and brittle)
Caulks and putties (If dry and brittle)
Fire doors & Walls
Flashing cement
Furnace cement
Gaskets (furnaces, boilers, woodstoves)
Interior wall and ceiling textures, skim and brown coats
Joint compound & taping mud compound
Nicolite™ roof paper
Patch compounds
Petroleum bound built up, felt layered, rolled, and patch roofing (non pliable, brittle)
Plaster
Sheet vinyl flooring
9"x9" floor tile and 12"x12" floor tile that have been shattered, fragmented, and broken into many pieces
Mastics (if dry and brittle)
Silver roofing paint
Sink undercoating (Sprayed on)
Spray applied insulation soundproofing and fireproofing
Spray applied textured or acoustical ceilings (popcorn texture, orange peel, trowel)
Stucco
Tank, and boiler insulation (White in color with chalk like appearance or may look like corrugated cardboard and is often called air-cell)-Not including fiberglass
Thermal system pipe insulation (White in color with chalk like appearance or may look like corrugated cardboard and is often called air-cell)-Not including fiberglass
Vapor barrier products (if dry and brittle)
Wallboards
Window glazing (if dry and brittle)
<u>Suspect Nonfriable Materials.</u>
Petroleum-bound nonfriable materials are generally pliable and will not be rendered friable unless brittle. Other types of nonfriable materials can be rendered friable by activities such as sanding, grinding, breaking, fragmenting, pulverizing, shattering, dozing, or if the nonfriable material is not handled appropriately.
Adhesives/ Mastics (pliable)
Cement asbestos board, known as CAB / Transite in whole pieces that have not been shattered or fragmented
Cement siding and roofing products, know as CAB / Transite in whole pieces that have not been shattered or fragmented
Cement water pipe (Not shattered or fragmented, whole pieces)
Petroleum bound built up, rolled, and patch roofing (pliable)
9"x9" floor tile, 12"x12" floor tile (Whole pieces not shattered, fragmented, or broken pieces)
Mastics (pliable, not dry nor brittle)
Window glazing (pliable)
